

Important: Read all instructions prior to installation.

LED Downlight Retrofit Kit

DL4D-30K14W-WH

Safety and Notes

- Product should be installed and serviced in accordance with applicable national, state, and local building and electrical codes.
- To reduce the risk of electric shock, ensure that the main power source and circuit breakers are switched off before performing any installation or wiring procedures. Do not use if wiring or light are damaged.
- Avoid looking directly into lamp when illuminated.
- Connect only to indicated voltage and in an appropriate environment to avoid potential damage or personal injury.
- Ensure all mounts are securely attached and will support the weight of the fixture. Failure to properly support fixture may result in damage or injury, for which the manufacturer does not assume responsibility.
- These kits are not for use in emergency lighting.

Specifications

Environmental Specifications	
Operating Temperature	-4°–113° F (-20°–45° C)
Environmental Rating	wet location

Check product label for specific electrical specifications related to installation.
Improper installation will void warranty.

Installation

1. Turn supply power to circuit off.
2. Remove existing bulb from fixture.
3. Thread adapter into fixture.
4. Attach light to adapter and securely install light into fixture.
Note: Kits require a minimum can depth of 5.5 in. (140 mm).
5. Reconnect supply power.

Note: 4-inch model (DL4D) shown. 5- and 6-inch model (DL56D) installs similarly, but utilizes a different style clip to hold the light in place.
