

# Model: LDR-2A LED Dimmer

## Features and Instruction Guide

### Features:

- PWM Dimming Range: 0-100% of input
- Input Voltage: Any DC Voltage between 5VDC and 40VDC
- Output Voltage: Continuously adjustable between zero and full-on
- Minimal no-load current (10-15mA)
- DC dimming of LED; Lamps, Bulbs, Light Bars & Strips, Clusters, Modules, any LED Product
- PWM design generates minimal heat
- Control up to 2 Amps maximum
- Efficiency is approx. 95% at most settings
- Adjust LED dimming level by built-in slider control or optional remote knob
