

PRODUCT DESCRIPTION

Cover dedicated to create a line of light using the LIPOD, LARKO, LOKOM, LESTO, KOZEL, KOZUS extrusions. A line of light is easily achievable with the LIGER 22 cover which has excellent diffusing properties. The cover's characteristics are high quality, uniform cross-section and high flexibility.

Light transmission: 70%*

* the values given in % are approximate values and because of the different optical phenomena occurring in different extrusions, these values may differ slightly.

- Good light diffusion
- Recommended to be used with bent extrusions
