

G+LUX LED Plug n'Play
Landscape Fixtures

professional-grade series from

superbrightleds.com

LED landscape lighting designed to fit every need...including profit.

You want to give your customers the best possible products while remaining affordable for them, yet profitable for you. The solution is G-LUX. A professional-grade line of LED plug n'play landscape fixtures from Super Bright LEDs. The series features fixture housings made from solid brass, stainless steel, and cast aluminum, with plug n'play connectors that make installation easy.

These versatile, heavy duty fixtures are enhanced with a sleek design style and advanced optics for even greater energy efficiency. Each fixture is fully-potted and sealed featuring a range of color temperature choices and a variety of beam pattern options, making them the best choice for any landscape lighting job. The diverse collection includes a variety of fixtures for spot / flood lighting, up-lighting, down-lighting, and underwater applications.

High-end quality fixtures your customers will love, at a price point you will appreciate.

Landscape Fixture LED Replacement Bulbs

Super Bright LEDs provides a wide selection of direct LED replacement bulbs for most common Incandescent and Halogen bulbs and fixtures. Energy efficient LEDs generally last 25,000 hours with common use, which means you never have to replace a bulb again! Visit our website to see our entire selection. In addition to the obvious power savings (generally 10-20% of standard bulb power consumption) other benefits include savings on power supply and wire size reductions.
